

Plantes herbacées des sous-bois

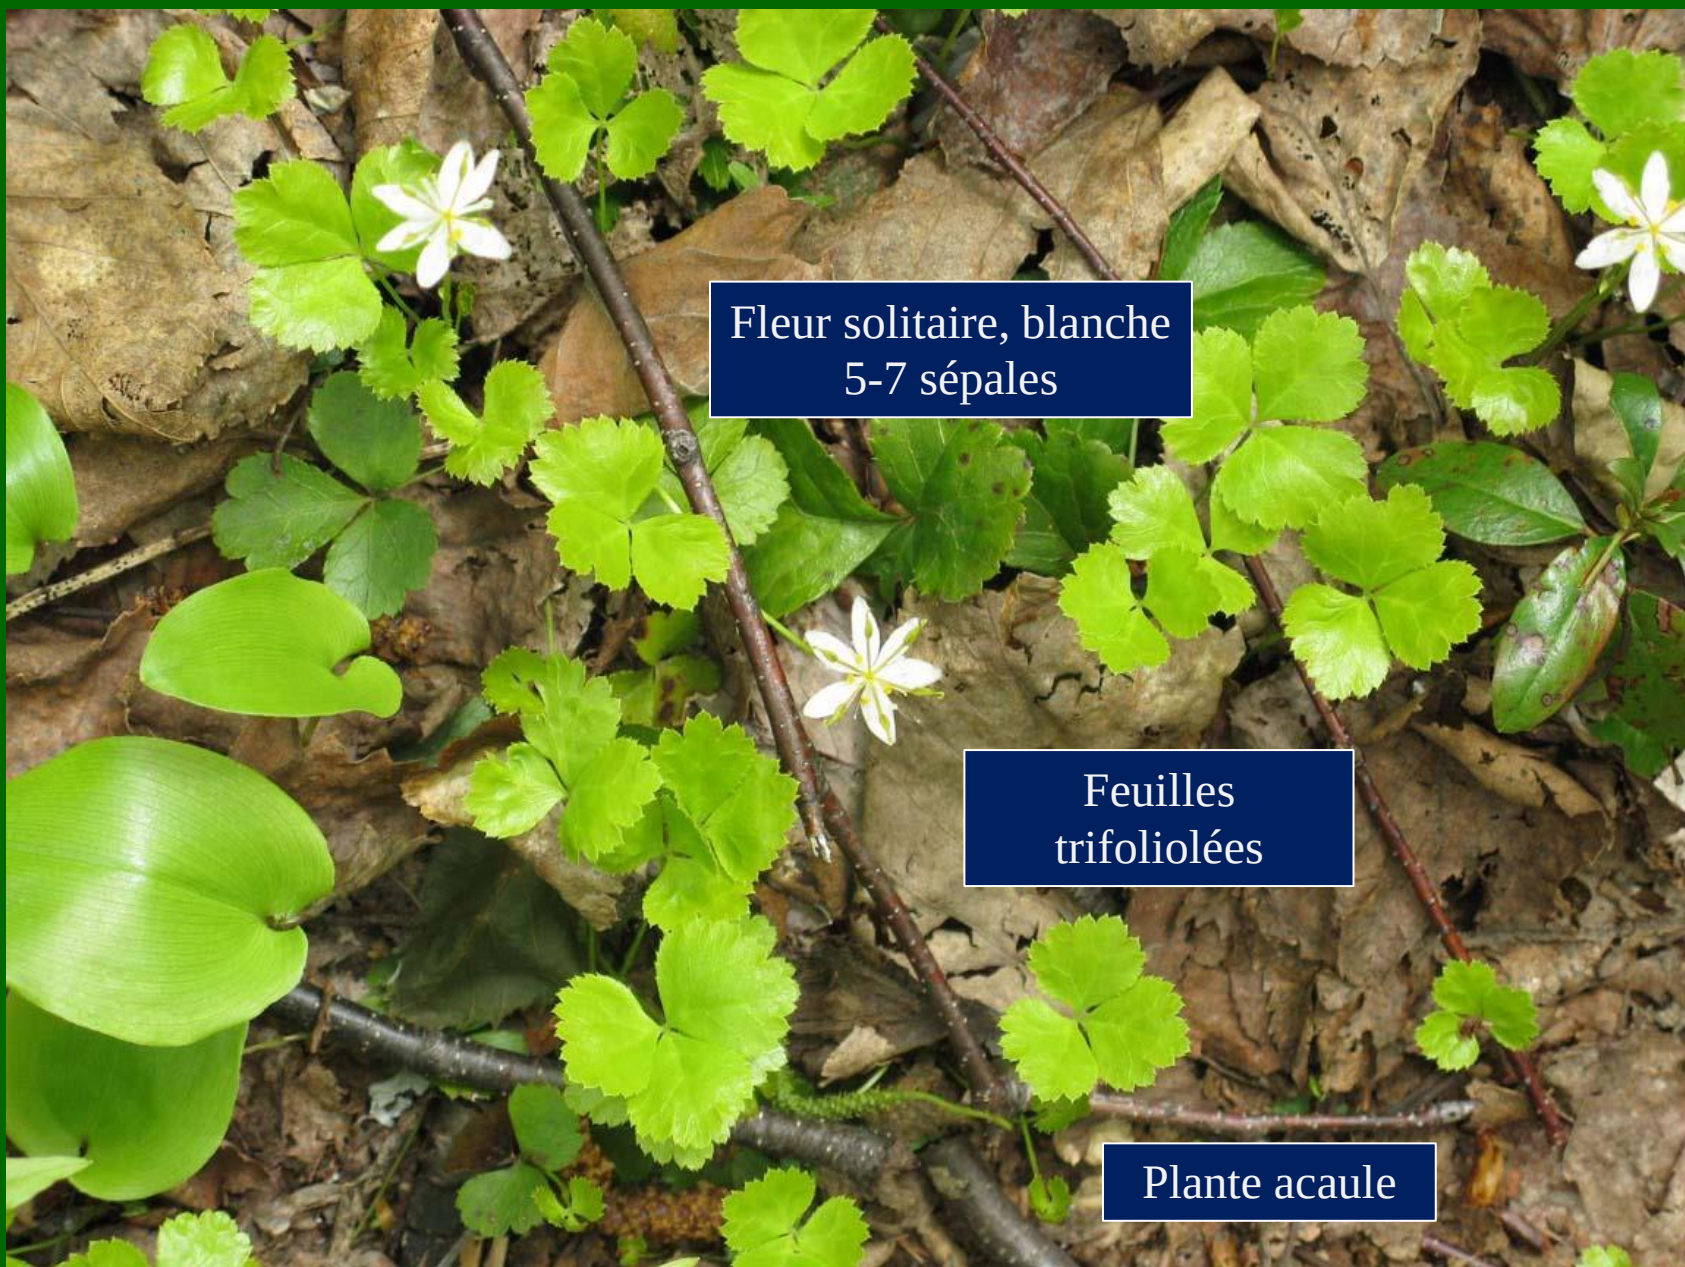

Aquilegia canadensis

Fleur rouge écarlate

Fleur munie de
cinq éperons

Aquilegia canadensis

Fleur solitaire, blanche
5-7 sépales

Feuilles
trifoliolées

Plante acaule

Coptis trifolia

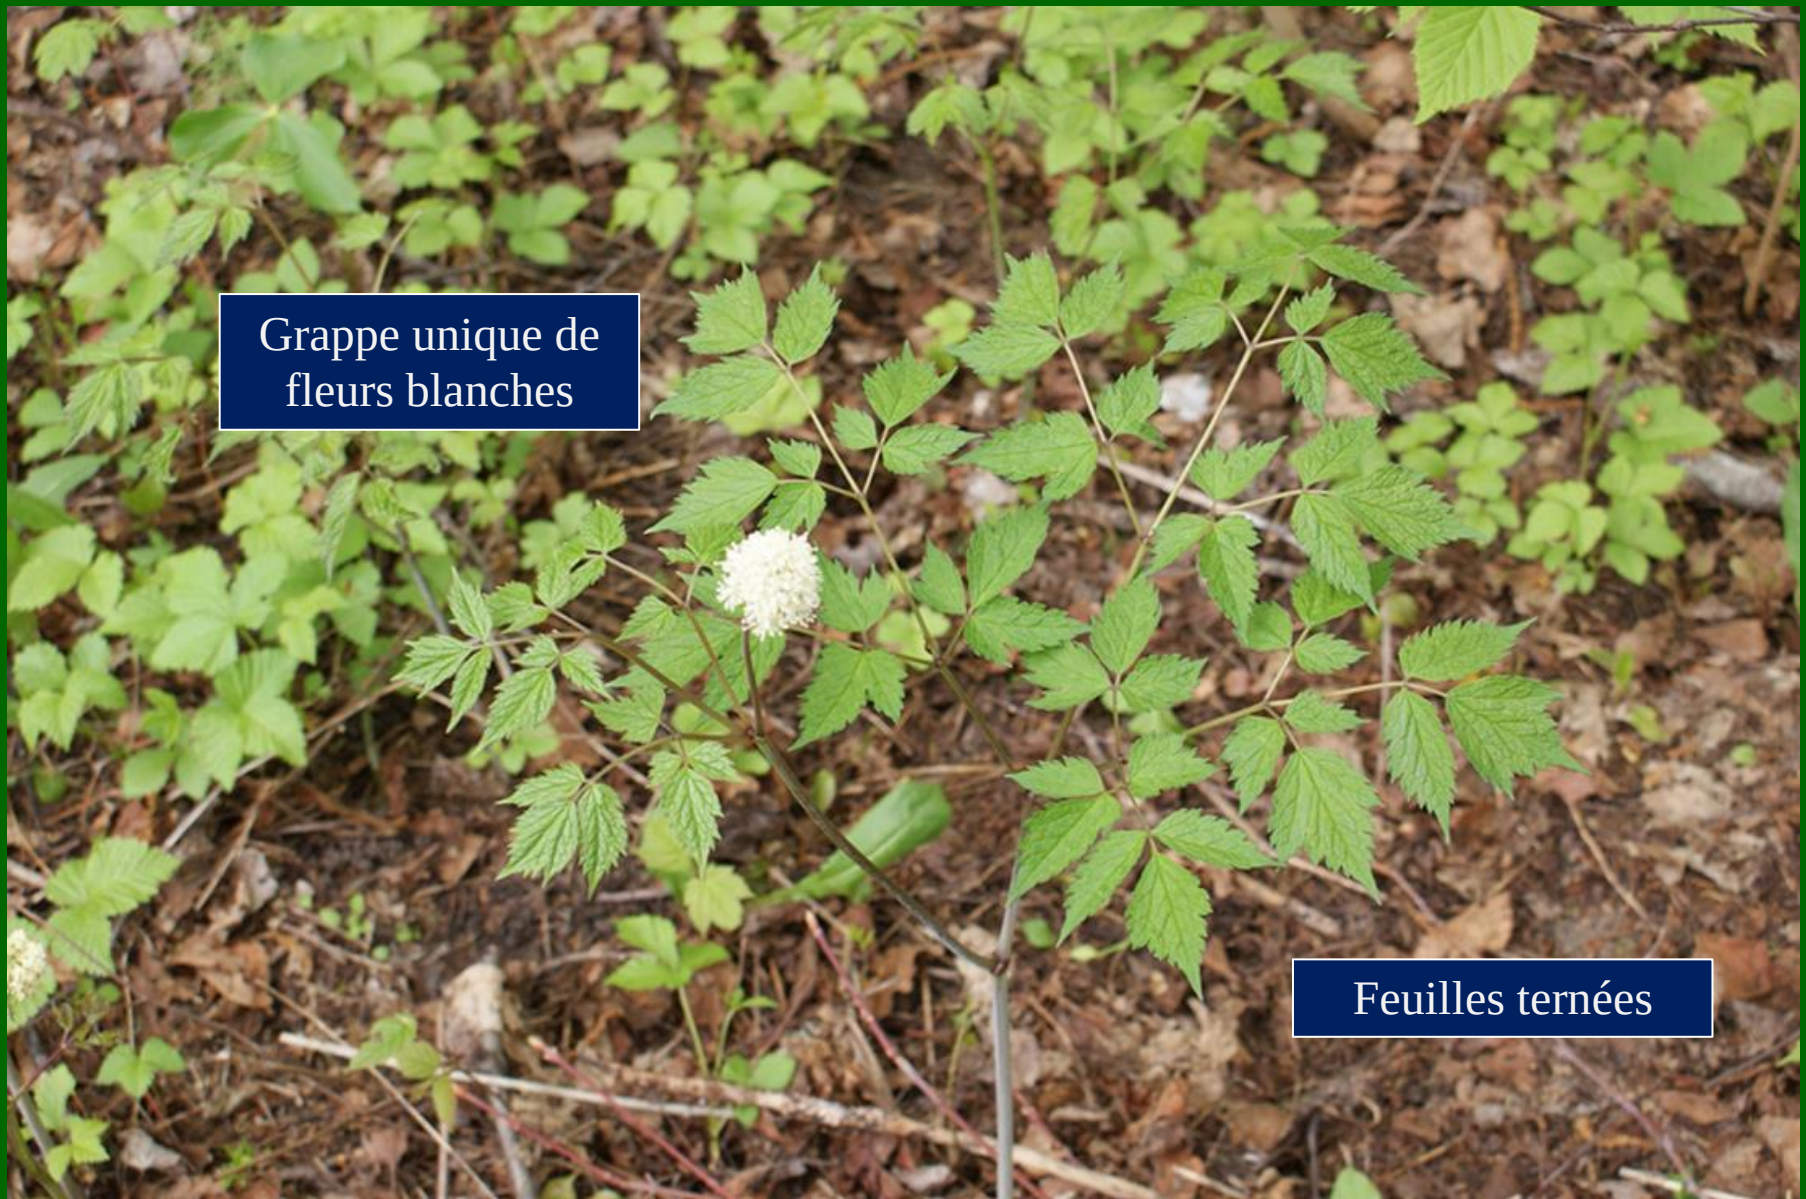

Rhizome jaune

Coptis trifolia

Actaea rubra

Grappe unique de
fleurs blanches

Feuilles ternées

Actaea rubra

Actaea rubra

Baies rouges

Actaea rubra

Actaea alba

Dicentra cucullaria

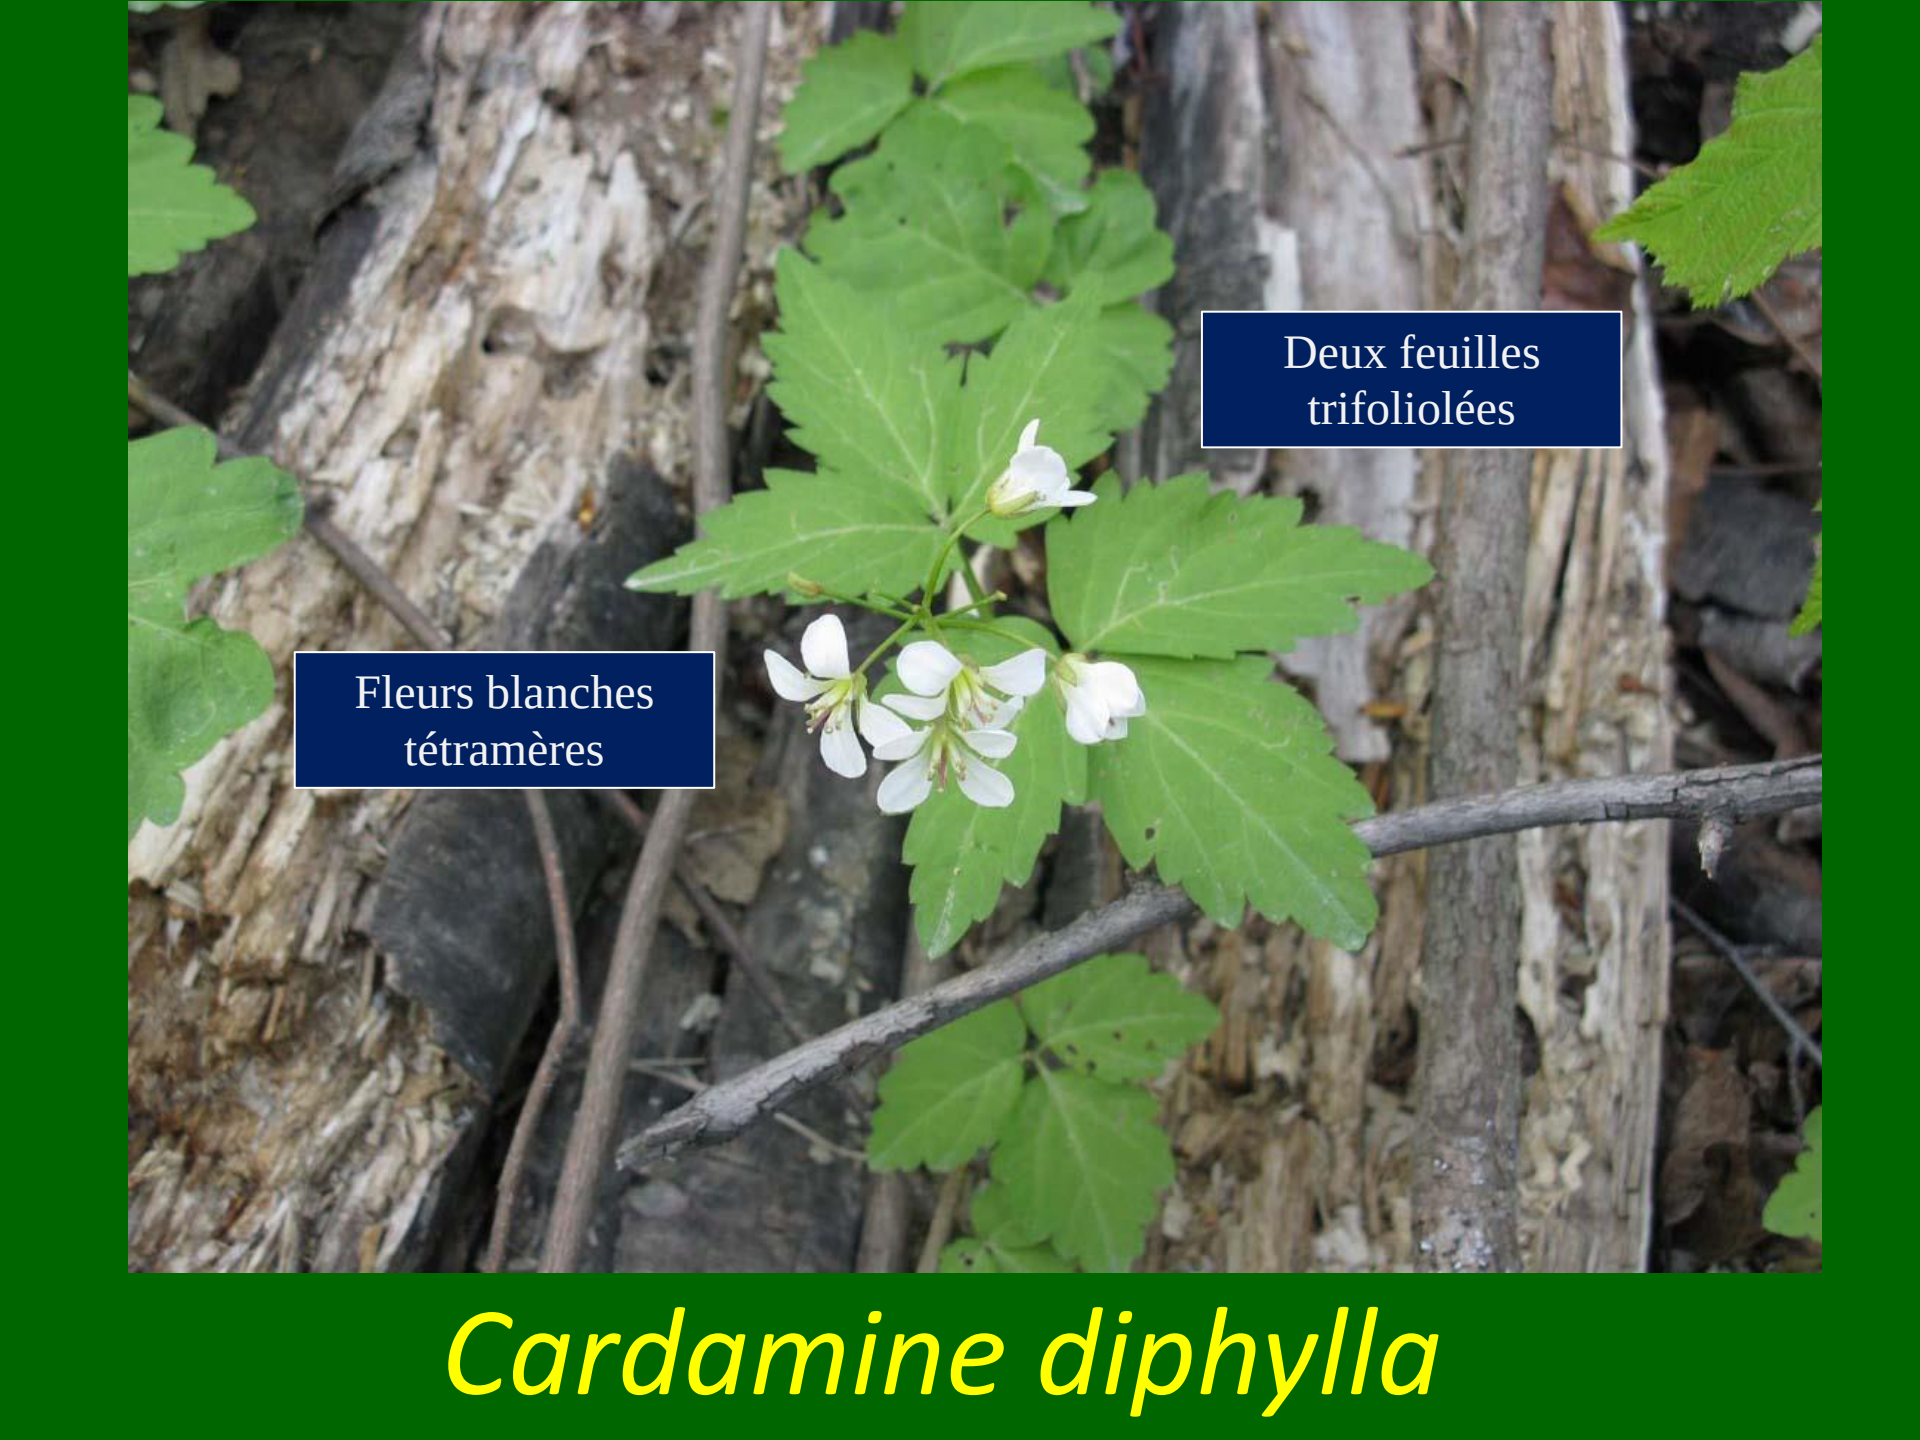

Feuilles finement
divisées

Fleurs blanches munies
de deux éperons

Dicentra cucullaria

A photograph of a Cardamine diphylla plant growing in a forest. The plant has bright green, deeply lobed leaves and clusters of small white flowers. The background consists of tree trunks and fallen leaves.

Deux feuilles
trifoliolées

Fleurs blanches
tétramères

Cardamine diphylla

Viola

Fleur irrégulière

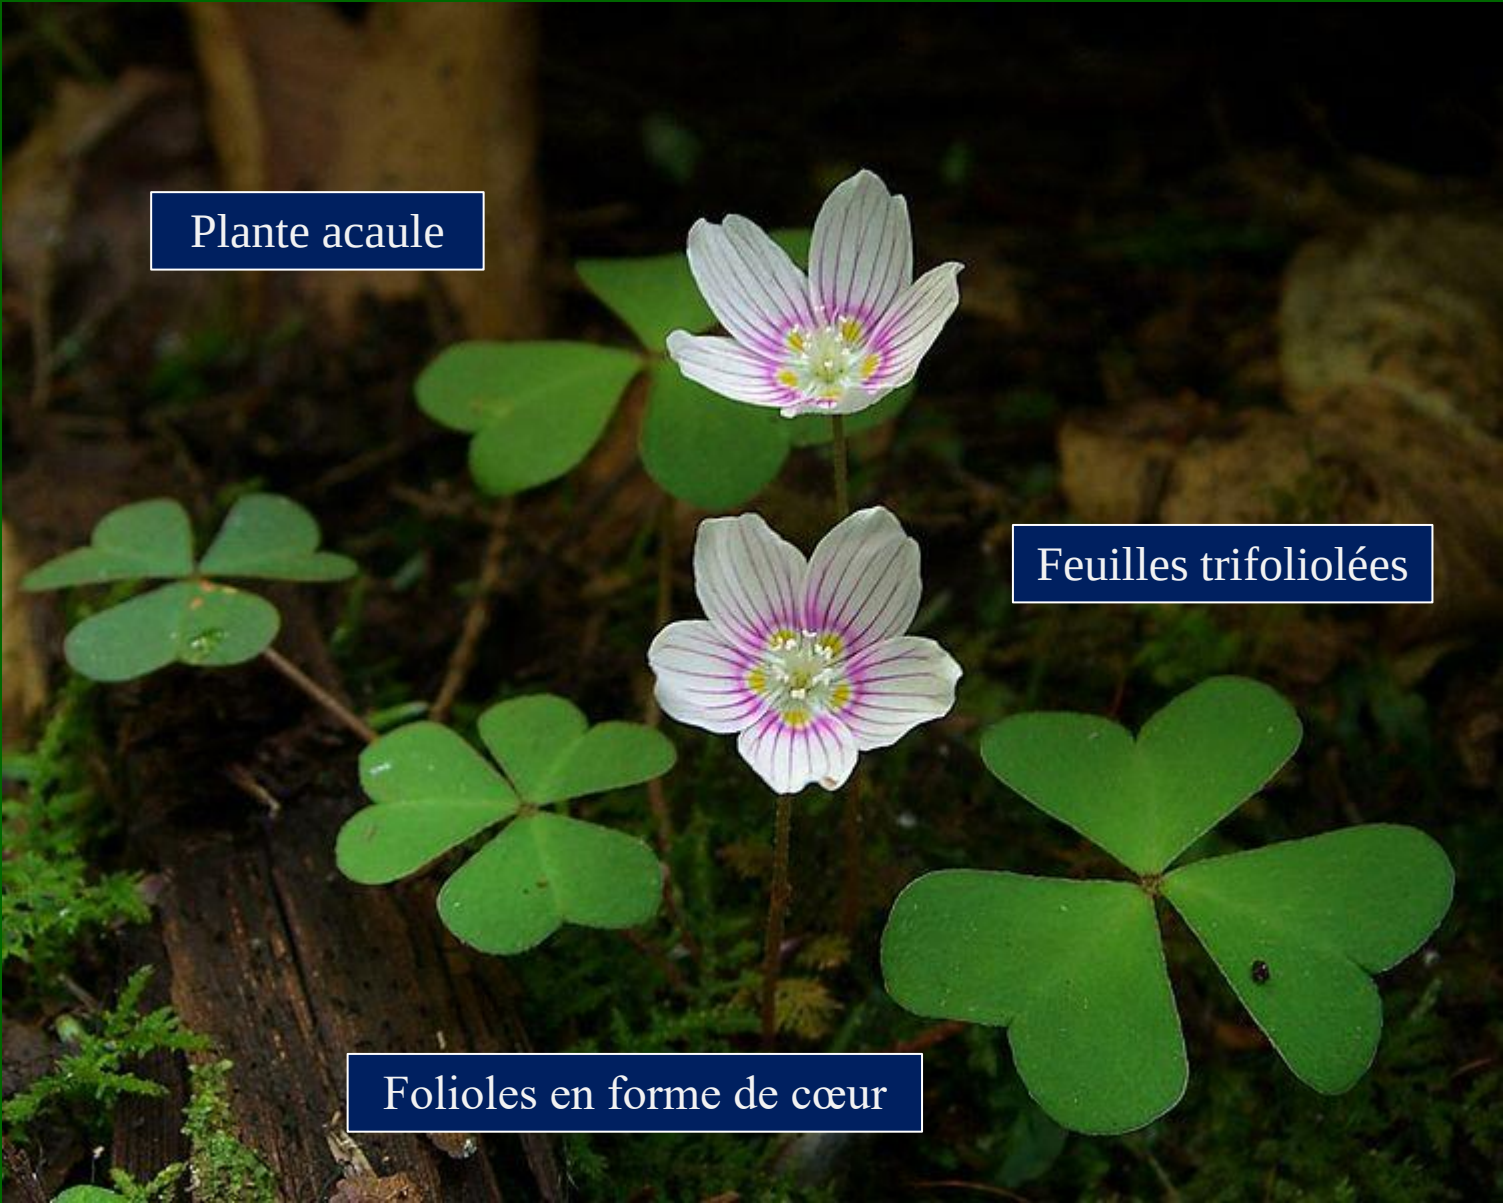

Viola

Viola

Viola

A photograph of Oxalis montana plants. The plants are acaule, with small, white flowers that have pinkish-purple stripes on the petals. The leaves are trifoliate, with each leaflet being heart-shaped. The plants are growing in a forest setting with moss and wood on the ground.

Plante acaule

Feuilles trifoliolées

Folioles en forme de cœur

Oxalis montana

Pétales veinés de rose

Oxalis montana

Plante acaule constituée d'une
unique feuille à 15 folioles

Aralia nudicaulis

A close-up photograph of three spherical flower clusters (umbels) of Aralia nudicaulis. The flowers are small, white, and numerous, radiating from a central point. The clusters are attached to green stems. The background is a blurred green, suggesting a natural habitat.

Généralement trois
ombelles de fleurs blanches

Aralia nudicaulis

Aralia nudicaulis

Aralia nudicaulis

Verticille unique de
5-10 feuilles

Fleurs blanches,
5-9 pétales

Lysimachia borealis

Lysimachia borealis

Plante acaule

Pyrola

Pyrola

Pyrola

Plante rampante

Verticilles de trois
feuilles et trois stipules

Fleurs et fruits
portés par trois

Galium triflorum

Eurybia macrophylla

Grosses feuilles
cordées, acuminées
et pubescentes

Eurybia macrophylla

Capitules violets au
centre jaune

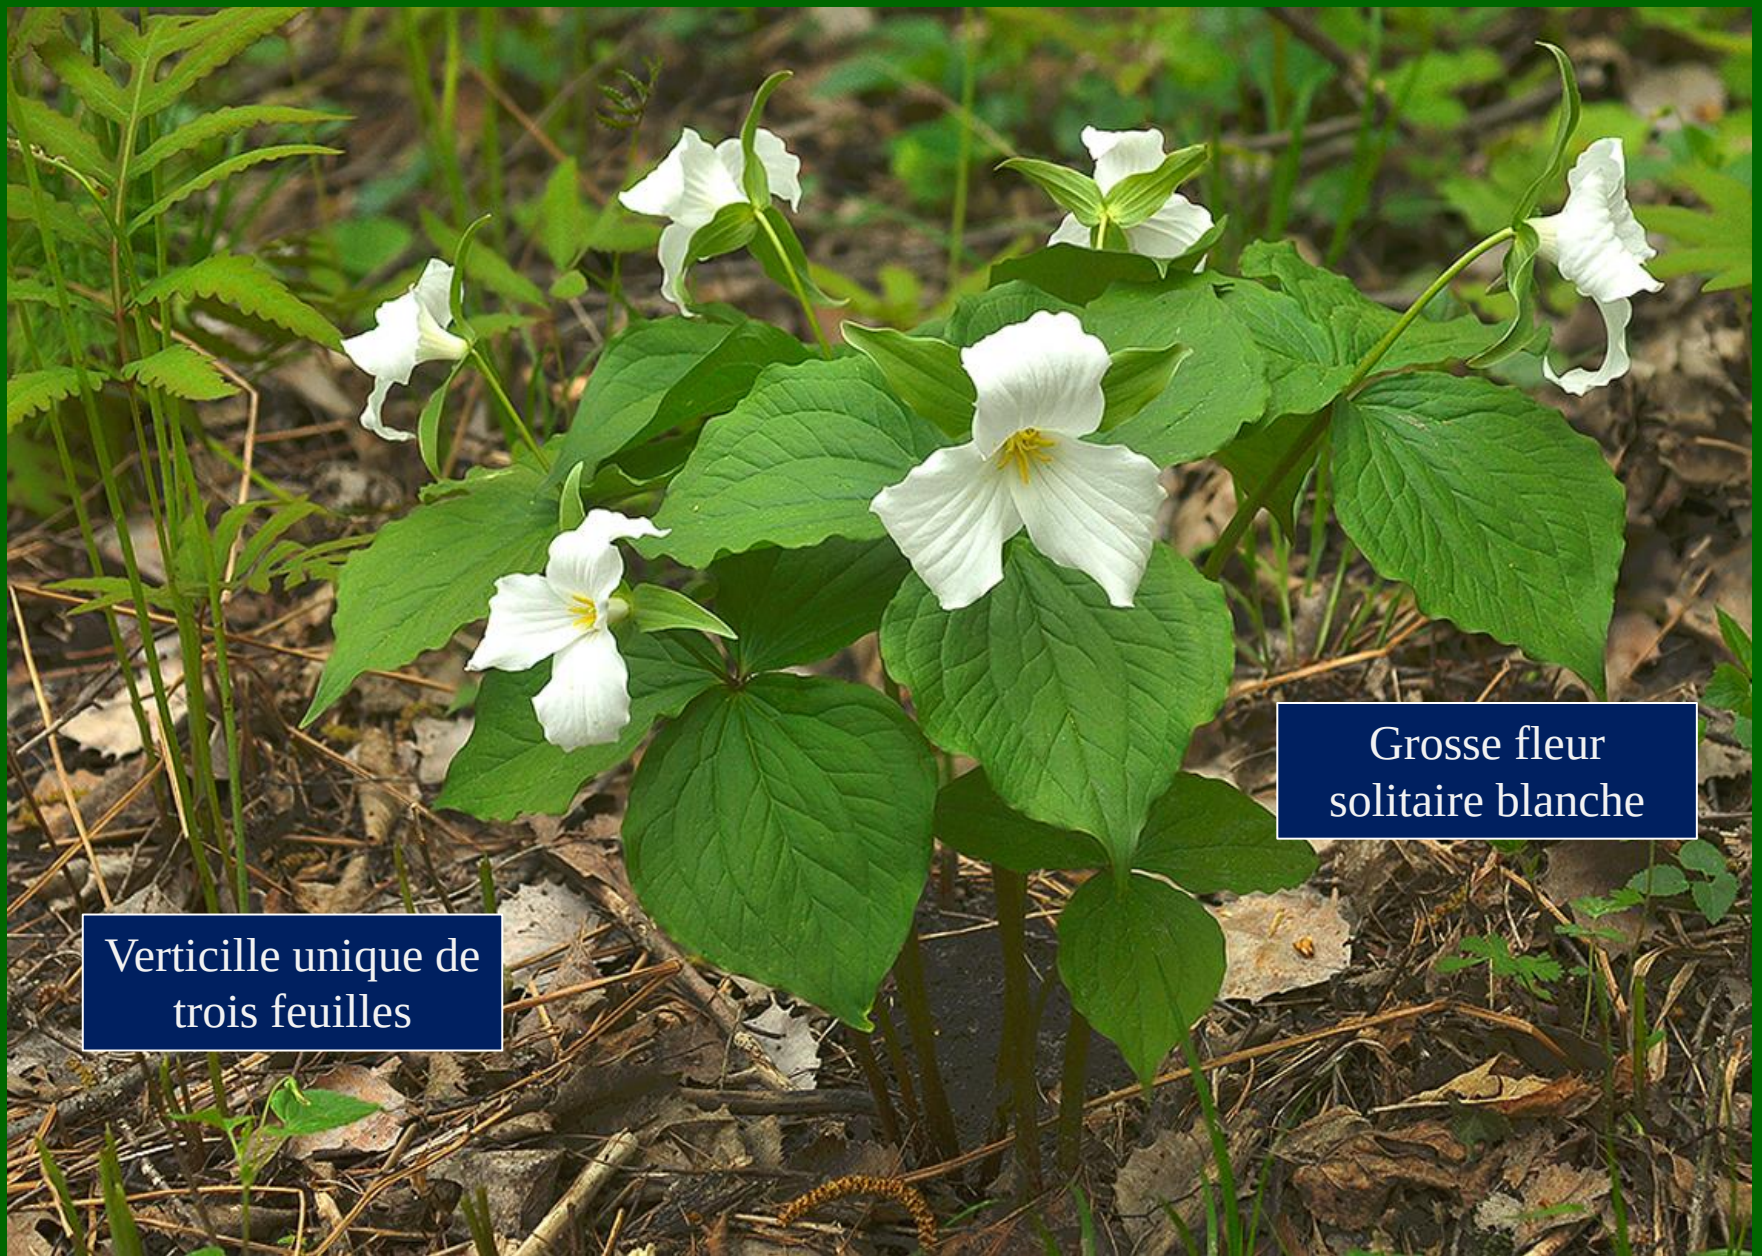

Eurybia macrophylla

Colonie
d'immatures

Eurybia macrophylla

Verticille unique de
trois feuilles

Grosse fleur
solitaire blanche

Trillium grandiflorum

Trillium grandiflorum

Verticille unique de
trois feuilles

Trillium erectum

Fleur solitaire
rouge

Trillium erectum

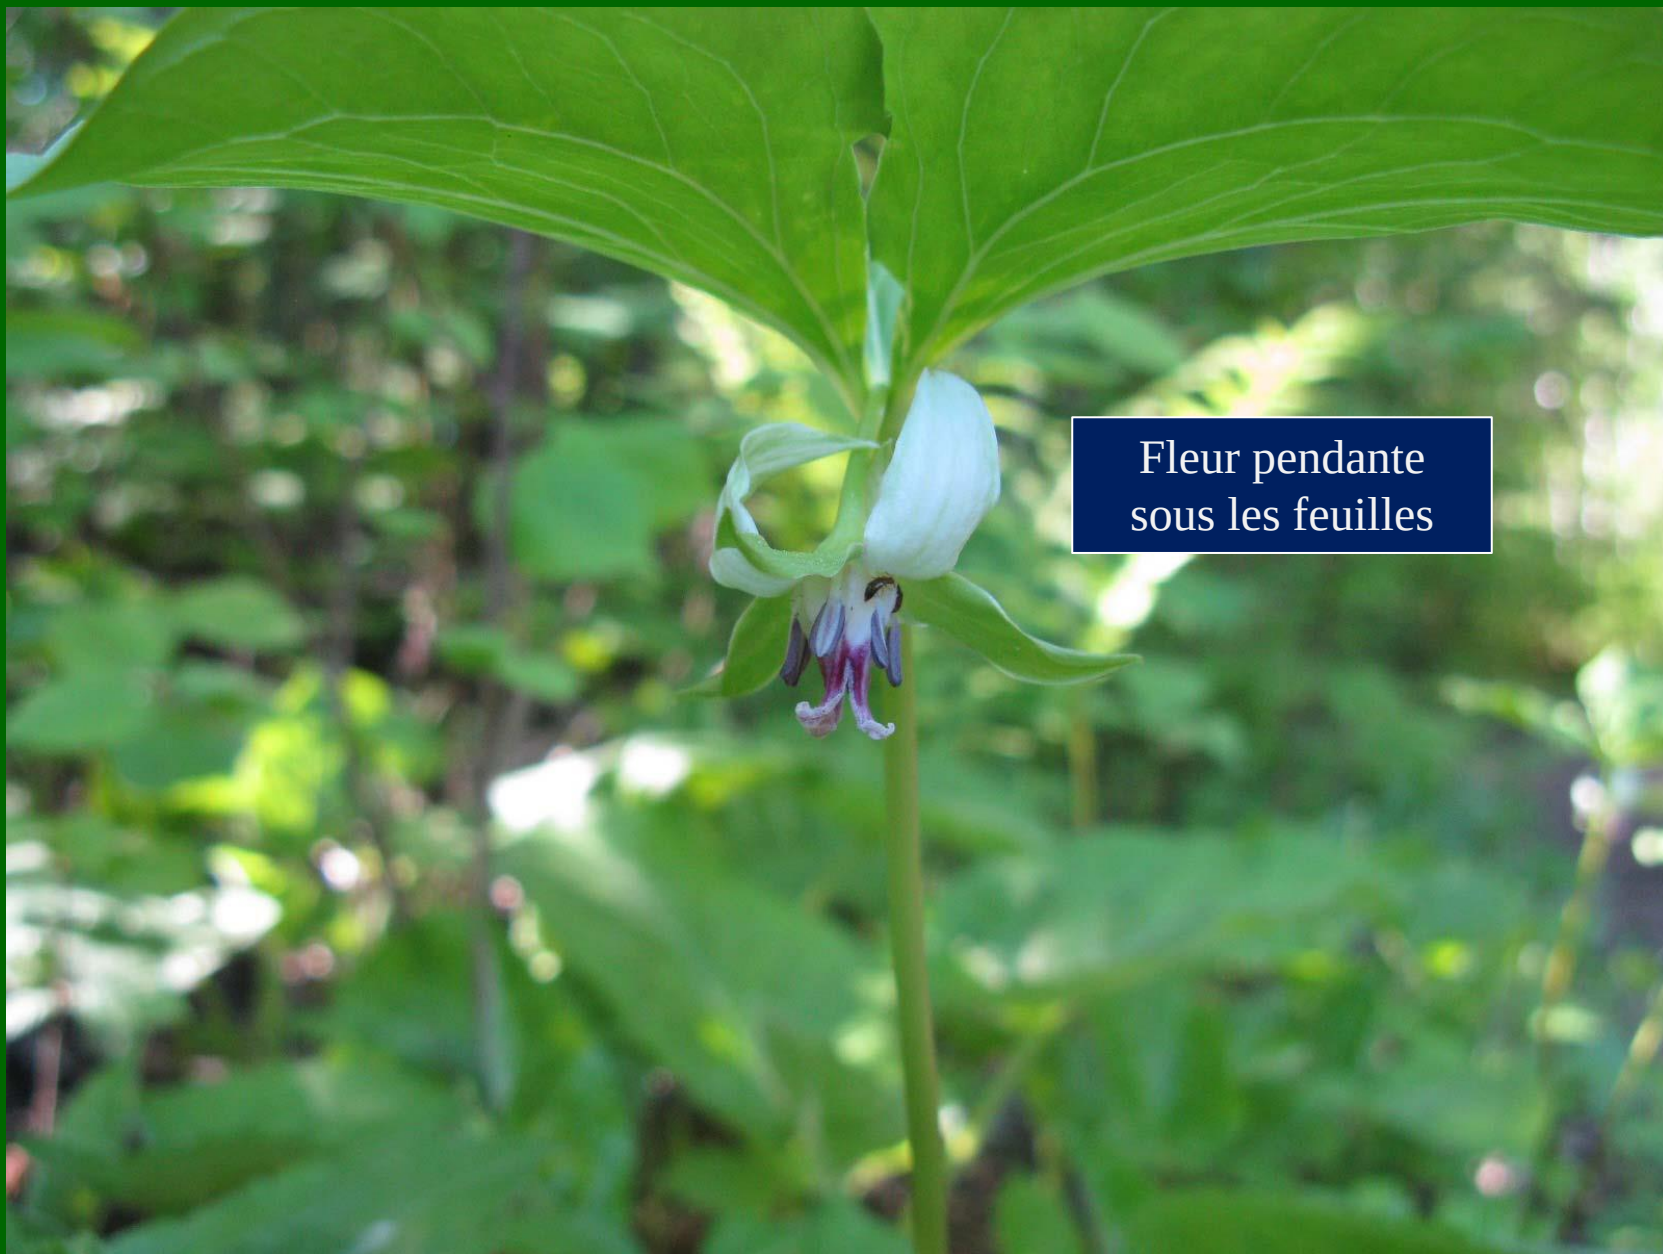

Trillium erectum

Fleur solitaire
blanche

Verticille unique de
trois feuilles

Trillium cernuum

Fleur pendante
sous les feuilles

Trillium cernuum

Trillium cernuum

Verticille unique de
trois feuilles

Fleur solitaire blanche
veinée de rose

Trillidium undulatum

Trillidium undulatum

Verticille supérieur
constitué de 2 à 5 feuilles

Tige portant deux
verticilles de feuilles

Verticille inférieur
constitué de 5 à 10 feuilles

Medeola virginiana

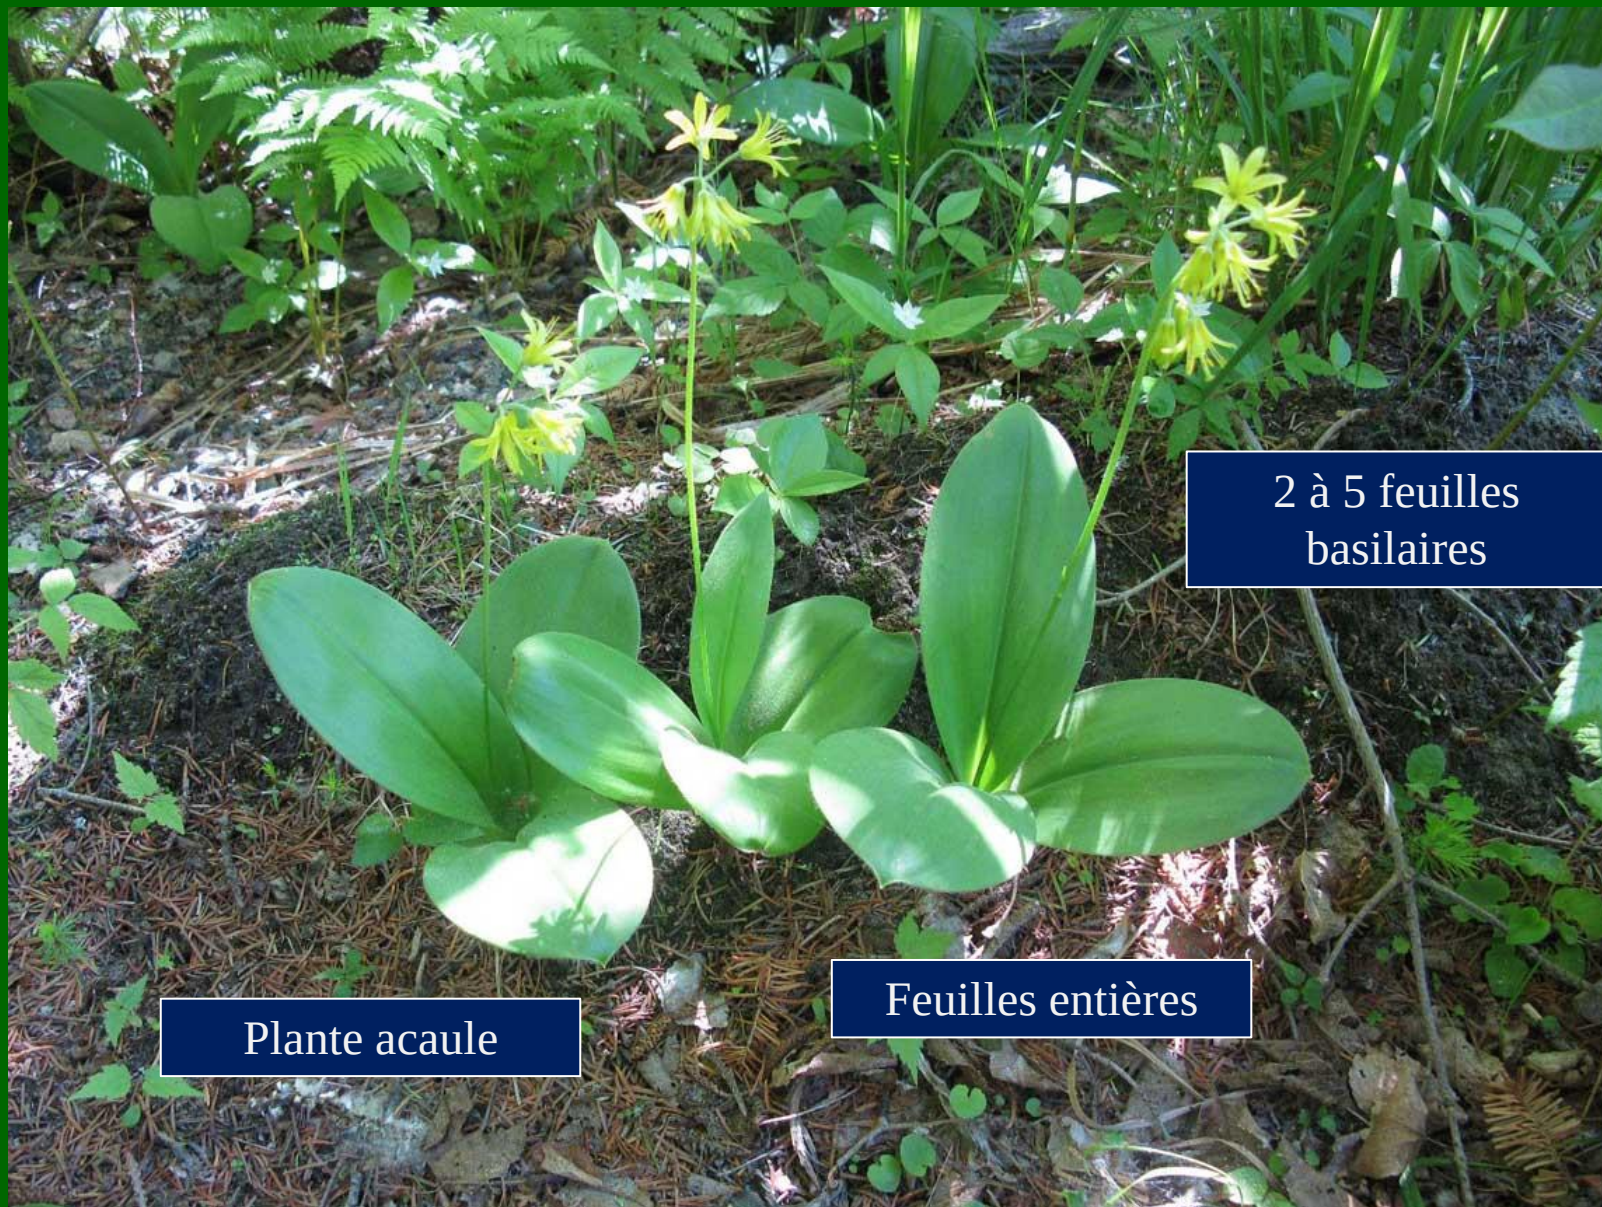

2 à 9 fleurs portées sous
le verticille supérieur

Medeola virginiana

Clintonia borealis

Clintonia borealis

A photograph of a Clintonia borealis plant in a forest setting. The plant has a single, upright, green stem. At the top of the stem is a cluster of three yellow flowers, each with six petals and prominent stamens. Below this cluster, there is a dense, drooping raceme of many small, yellow, bell-shaped flowers. The plant is surrounded by green foliage, including large, heart-shaped leaves and ferns. The ground is covered with brown leaf litter.

Ombelle de 3 à 8
fleurs jaunes

Clintonia borealis

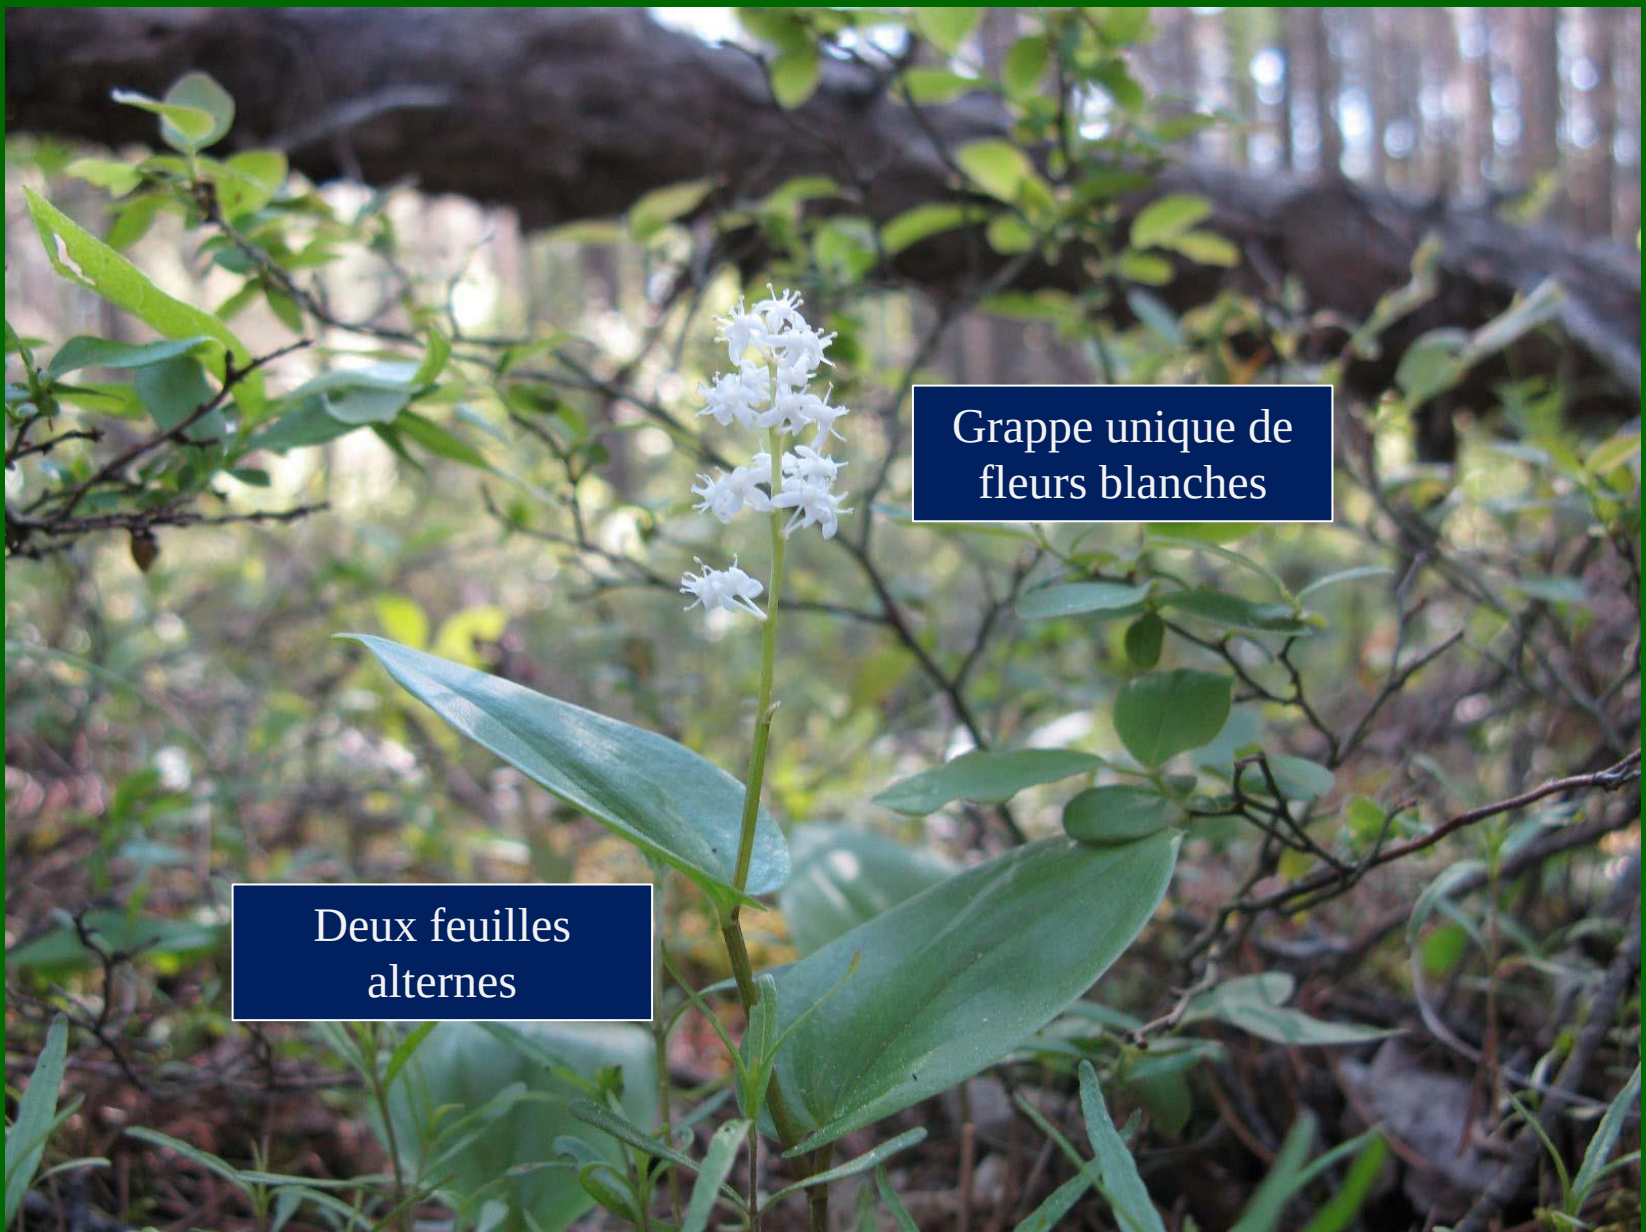

Baies bleues

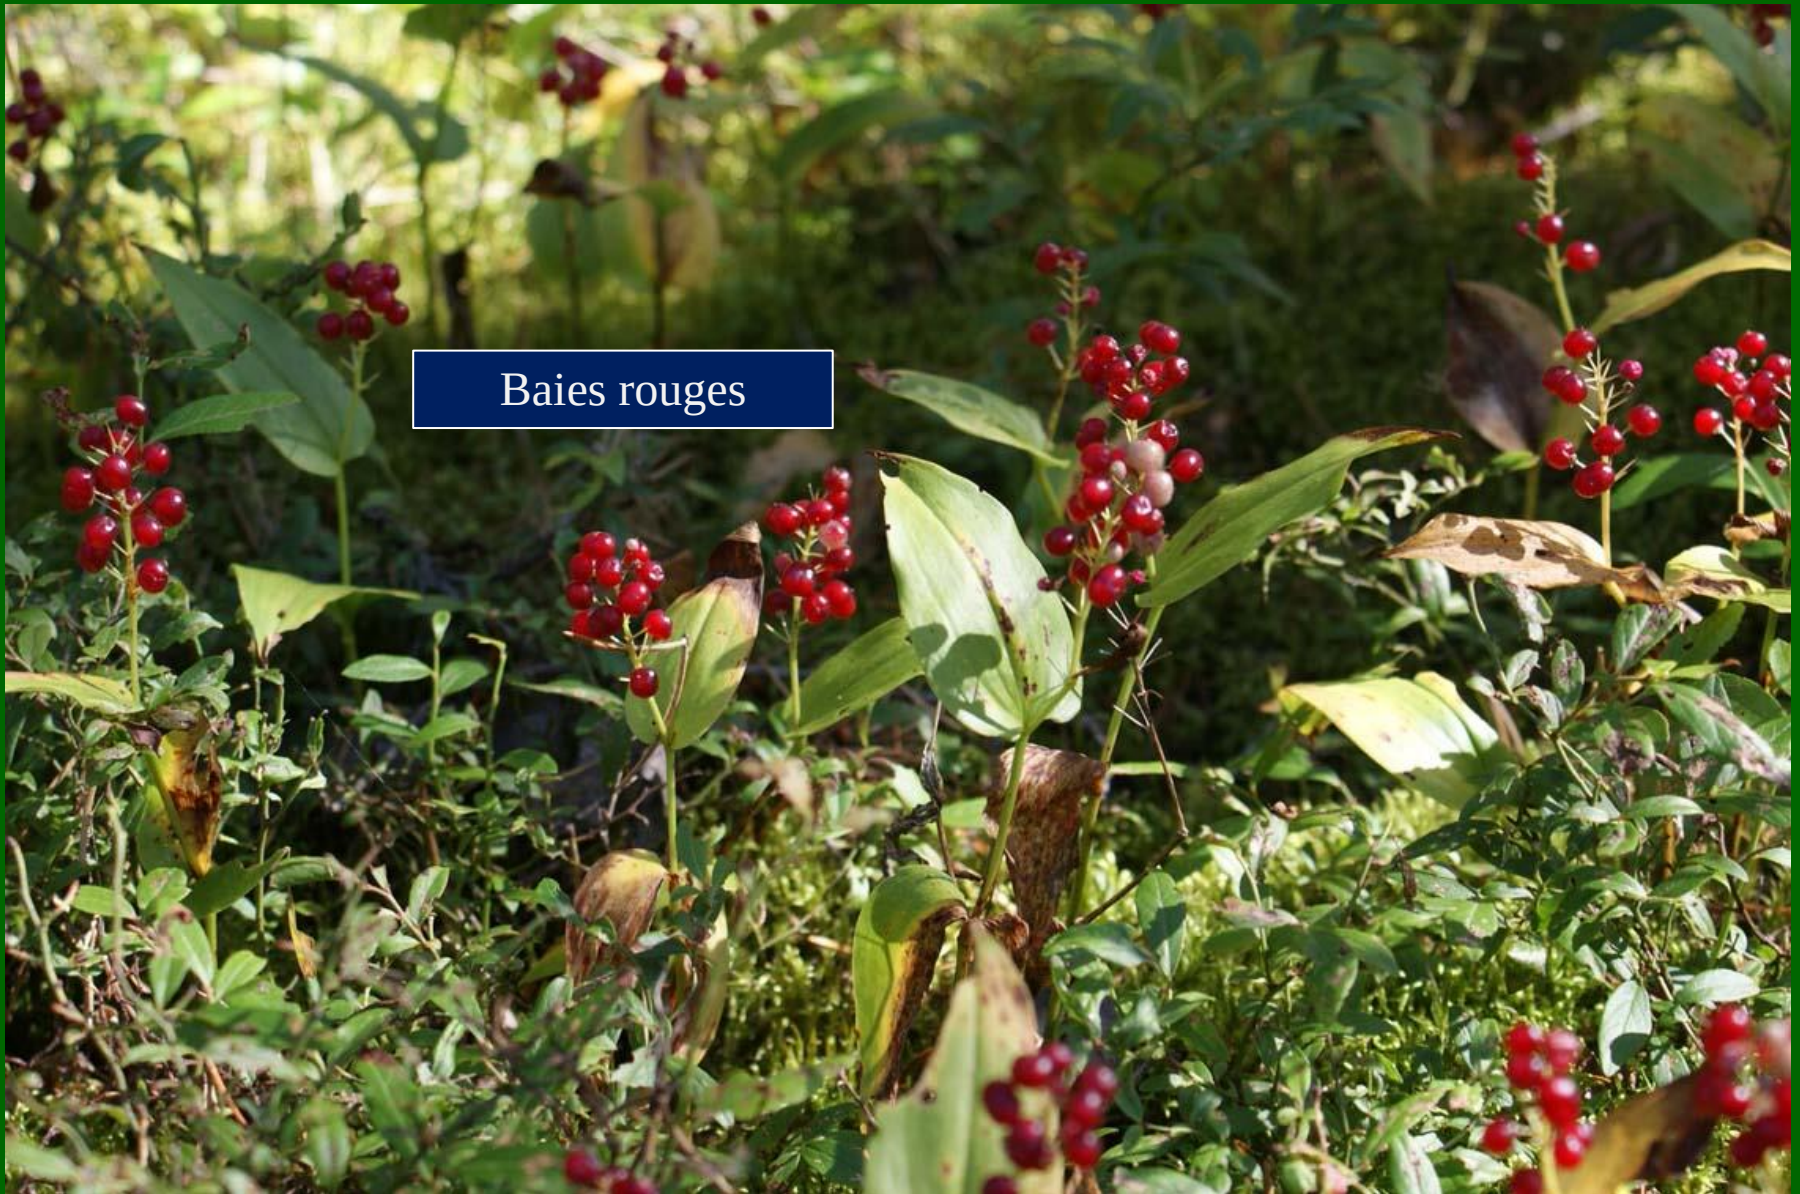

Clintonia borealis

Maianthemum canadense

Maianthemum canadense

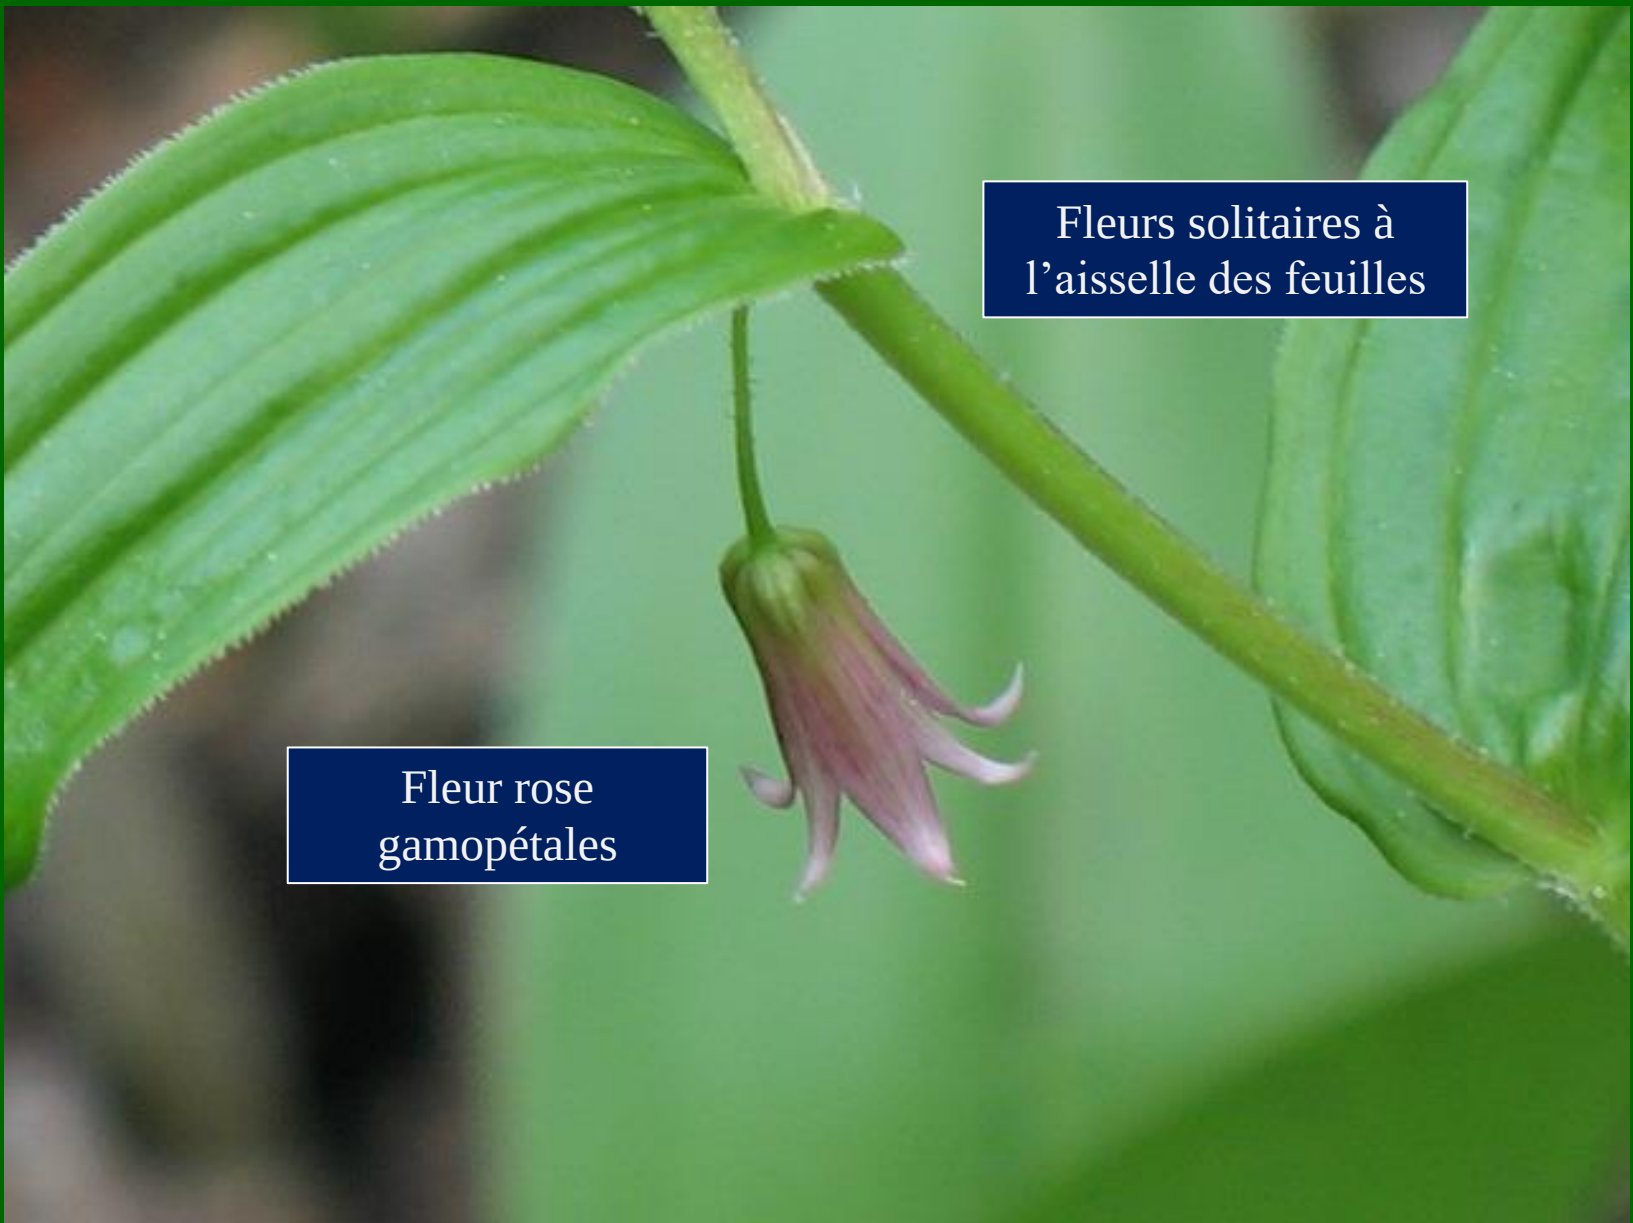

Baies rouges

Maianthemum canadense

Tige ramifiée

Streptopus lanceolatus

Fleurs solitaires à
l'aisselle des feuilles

Fleur rose
gamopétales

Streptopus lanceolatus

Streptopus lanceolatus

Tige non ramifiée

Fleurs vertes, géminées, dans
les aisselles des feuilles

Polygonatum pubescens

Feuilles et fruits
glaucques

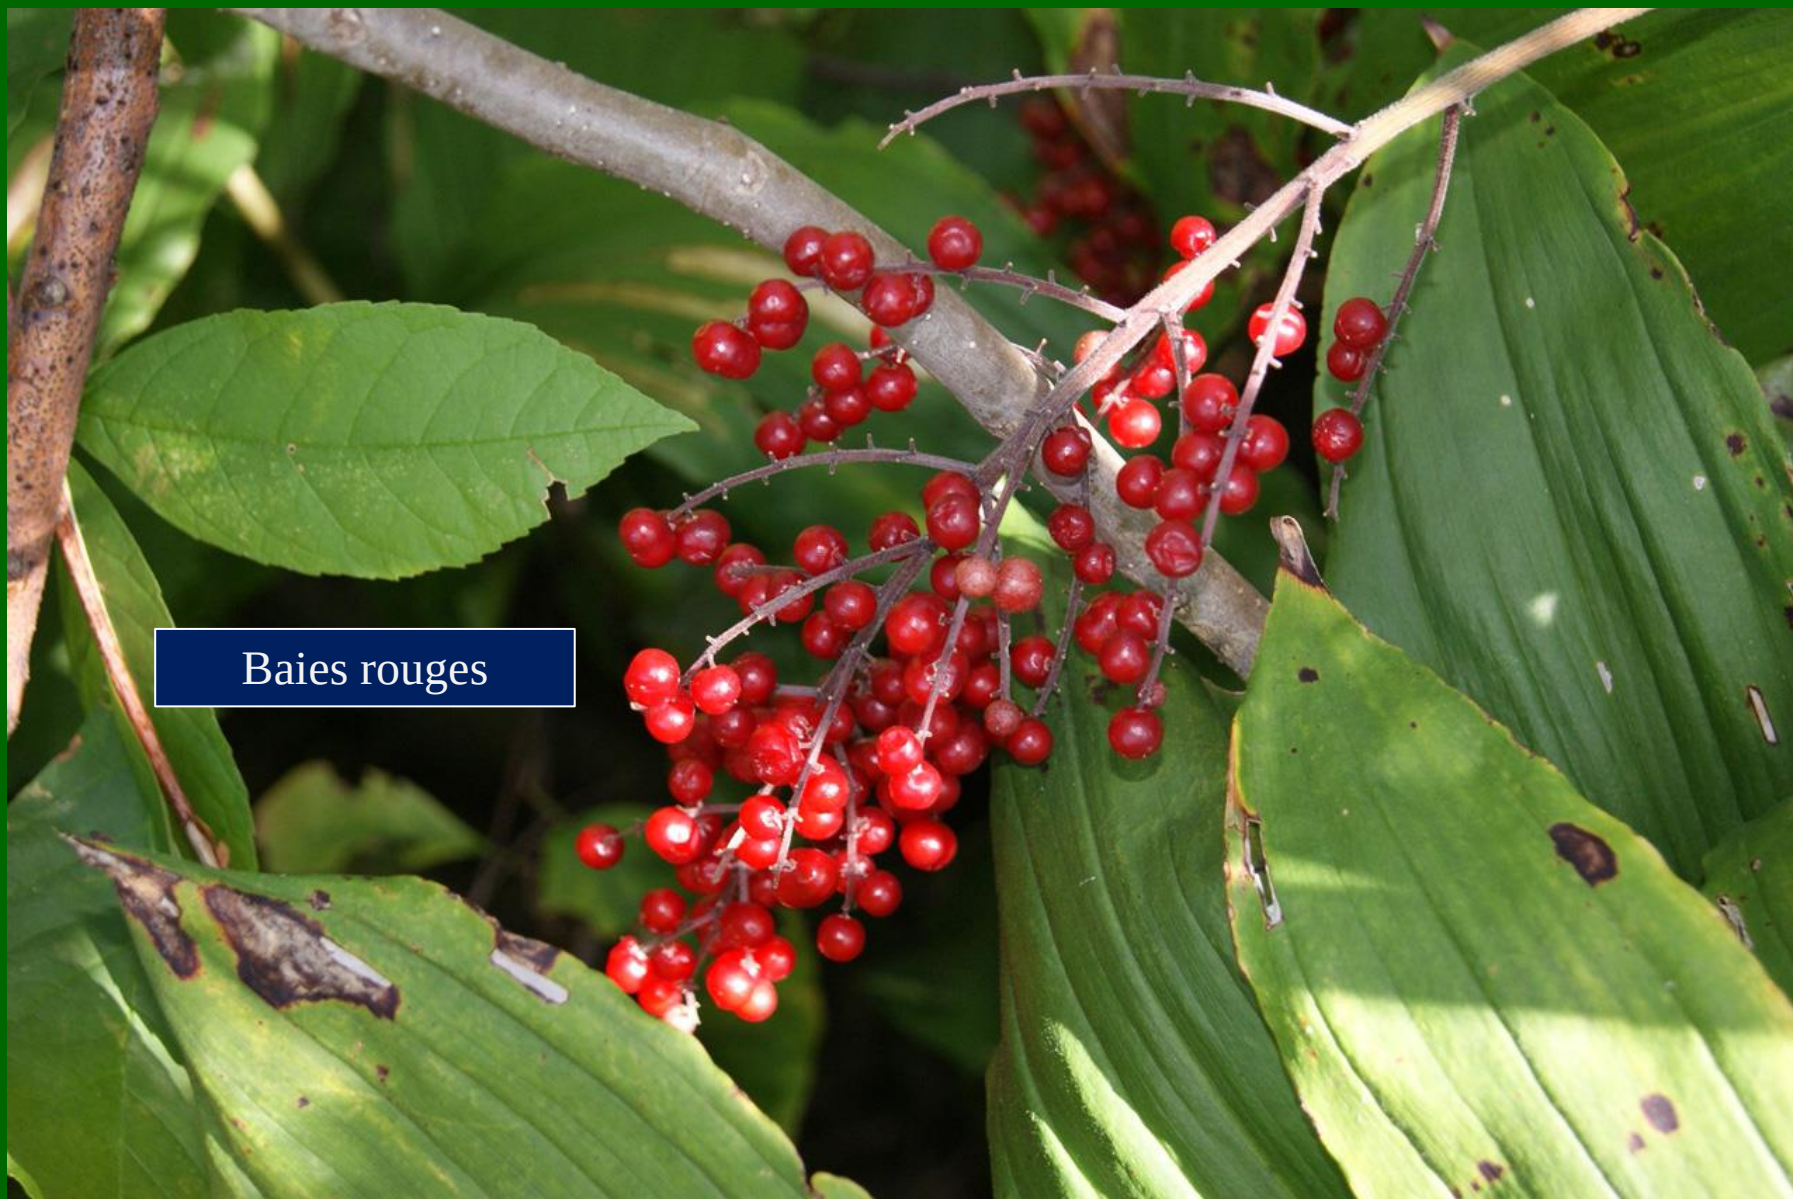

Polygonatum pubescens

Panicule unique de
fleurs blanches

Grosses feuilles
entières

Maianthemum racemosum

Baies rouges

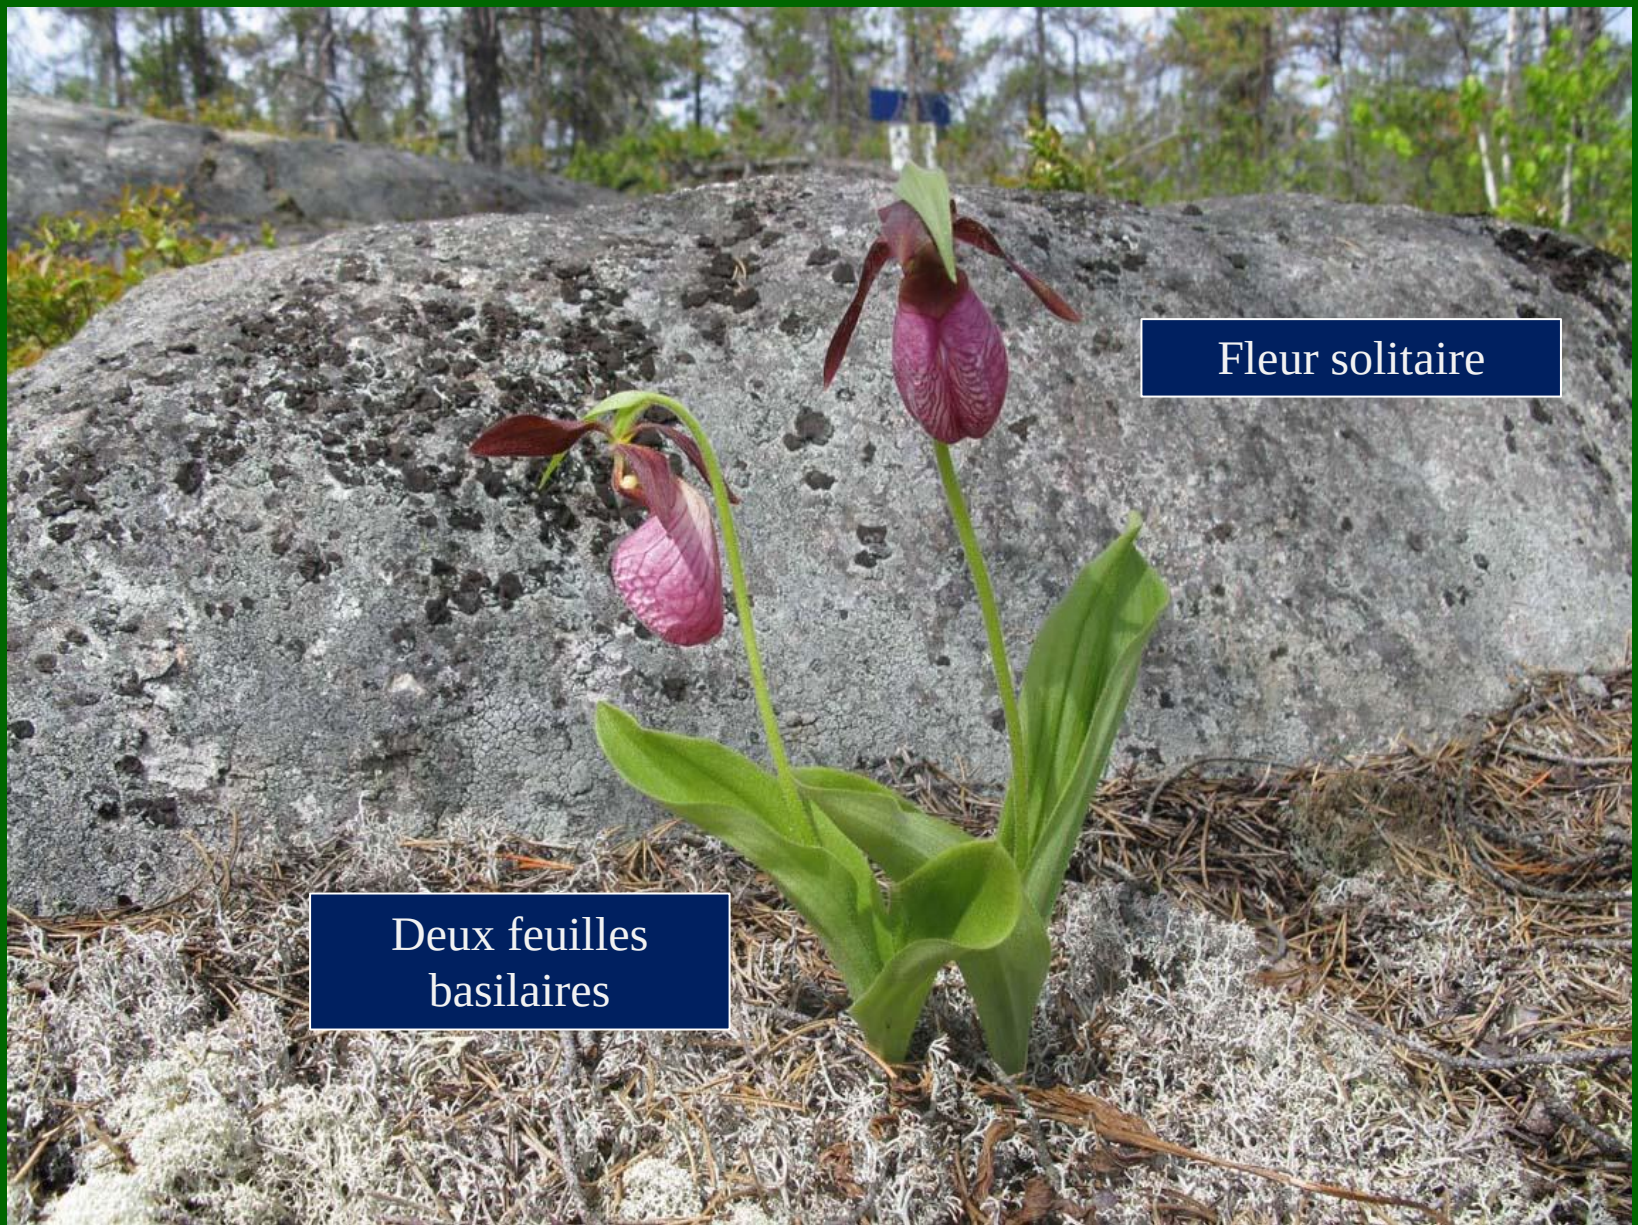

Maianthemum racemosum

Erythronium americanum

Erythronium americanum

Fleur solitaire

Deux feuilles
basilaires

Cypripedium acaule

Labelle rose

Cypripedium acaule

Deux feuilles
trifoliolées

Arisaema triphyllum

Spathe pourpre
rayée de beige

Arisaema triphyllum

A close-up photograph of a cluster of bright orange, round berries of Arisaema triphyllum. The berries are tightly packed and have a glossy, slightly wrinkled texture. They are attached to a green stem. The background is dark and out of focus.

Baies orangées

Arisaema triphyllum
